# GuardianChain: Revenue Model & Compliance Deck

This deck outlines GuardianChain's revenue-sharing system, GTT token utility, DAO structure, and partner-facing compliance features. Designed for grant bodies, investors, and institutional collaborators.

Revenue Distribution Model

- Capsule Minting: 70% Creator / 20% DAO / 10% Platform

- Capsule Unlock: 50% Creator / 25% Referrer / 25% DAO

- GTT Yield Rewards: 90% Creator / 10% DAO Reserve

- Gated Content: 60% Creator / 30% Platform / 10% DAO

- Vault Hosting Fees: 100% Platform (cost recovery + 25% markup)

DAO Treasury Flow Diagram

[Revenue Event] --> DAO Treasury

DAO Treasury --> Grant Programs

DAO Treasury --> Validator Incentives

DAO Treasury --> Compliance/Audit Fund

DAO Treasury --> Emergency Legal Reserve

GTT Token Use Cases

- Capsule mint fee + unlock gate

- Yield staking + capsule dividend share

- Governance participation (DAO votes)

- Truth validation and capsule scoring incentives

- Access to Sovereign AI, time-release, remix tools

Compliance & Legal Disclaimers

- GTT is not a passive security: rewards require active capsule creation, staking, or sharing.

- Full revenue disclosures are published at guardianchain.app/revenue-sharing-policy.

- KYC/AML tiers are implemented for fiat off-ramp compliance.

- GuardianChain maintains legal separation between platform ops and DAO decisions.

- All creators agree to Terms of Revenue Sharing during onboarding.
